Fully Stabilized Nose & Pocket

Hammerless Pin for Safe & Easy Installation

- (L/R) Left and Right Hand Spade Adapters Available
- (SL) Straddle Leg End Adapters Available
- (IC) Integral Corner Adapters Available
- R Round
- S Square

TEETH & ADAPTERS

REVOLUTION

- Fully Stabilized Nose & Pocket
- Hammerless Pin for Safe & Easy Installation
- Patented Technology

Hammerless Pin & Lock

- Fully hammerless installation & removal for safe and easy use.
- Accept both imperial or metric socket, female square drive on opposite end.
- Lock and pin may be used on either side of nose.
- Locks with 180° clockwise turn of pin with socket wrench.
- Pin removal pulls out excess material around the pin head.

Fully Stabilized Nose & Tooth Pocket

-  Primary contact for frontal loads. Bottom out fit with pocket mitigates fit erosion through service life.
-  Secondary contact areas for off center frontal loads. Planer bearing areas provide longer service life.
-  Redundant frontal load bearing if the primary and secondary areas are worn from tooth overuse.
-  Front = Primary bearing area for vertical tooth loads. Rear (opposite side) = Reactive load bearing area for vertical loads.
-  V design forces the tooth to center on the nose when heavy side forces are encountered. Preventing pin loading and increases fit integrity.
